THE NEWSPAPER FOR THE GOLF COURSE INDUSTRY

A UNITED PUBLICATION **VOLUME 14, NUMBER 8** AUGUST 2002 • \$7.00 www.golfcoursenews.com

Fertigation demystified

Fertigation use is on the rise as superintendents discover the agronomic and budgetary benefits.....6

Readjusting the numbers

A joint poll by the NGF and the NGCOA shows fewer rounds played than previously thought.....14

RENOVATION COMMUNICATION

In the latest installment of a series tracking the progress of the renovation project at Willoughby Golf Club in Stuart, Fla., superintendent Kevin Downing outlines the need to keep members informed about the progress of renovation work (members playing on a soon-to-be-closed green are pictured above). He also discusses the ins and outs of the bidding process. See page 12.

New Bayer ES head: 'Bar has been raised'

By ANDREW OVERBECK

MONTVALE, N.J. - The field of major agrochemical players narrowed further in late May as the U.S. Federal Trade Commission (FTC) approved Bayer AG's acquisition of Aventis CropScience from

Aventis SA and minority owner Schering AG (GCN July 2002).

The buyout marks the demise of another multinational player and the creation of Bayer Environmental Science.

Josh Weeks, former vice president of Aventis Environmental Science's Chipco Professional

Products group, will head the new professional products division of Bayer ES.

DIVESTING FIPRONIL

One of the first challenges facing Weeks will be the forced divestiture of two key product lines. As part of the approval, both the FTC and the European Commission are requiring Bayer ES to dispose of its fipronil and acetamiprid product lines.

While acetamiprid is a neonicotinoid class of chemistry that is being developed primarily for the greenhouse industry, the fipronil divestiture will directly impact the golf market. As part of the deal, however, Bayer ES will Continued on page 18

POINT

Dr. Michael Hurdzan and Tom Page Fazio debate what impact golf cars have on course design and the game of golf.

Quarry Hills sets new opening date

By DEREK RICE

QUINCY, Mass. - Reports of the death of the Quarry Hills Golf Course outside of Boston are greatly exaggerated, according to one of the project's developers, Chick Geilich.

"It's interesting how the stories get totally twisted," Geilich said. "We extended our contract with the Big Dig to accept 50 percent more dirt

than our original contract and as a result of bringing in this extra dirt, we are a year behind our original projected finishing date."

In recent months, published reports have

With nine holes completed, Quarry Hills is looking toward an early 2003 opening.

suggested that the development had stalled because of run-ins with city officials and a lack of Continued on page 19

Lahontan Golf Club pushing organic boundaries

By DOUG SAUNDERS

TRUCKEE, Calif. -While other courses in the High Sierra are considering what synthetic materials to use to jump-start spring turf growth, Lahontan Golf Club here is taking an organic approach. Each spring, head superintendent Kevin Breen's crew diligently spreads 43 tons of chicken crumbles on the 130 acres of fairways to build up the soils before opening day.

Six years of organic efforts at Lahontan, an 18hole Tom Weiskopf-designed course, have begun

(Left to right) Mike Kosak, Martyn Hoffman and Kevin Breen

to pay off. Each year Breen healthy stand of turf. The direction toward an organic maintenance protilization to sustain a gram was put into place under the watchful eye of Mike Kosak, the director of agronomy. This enclave of mountain homes and the only private golf club in the Lake Tahoe region has stressed a careful environmental program to blend the development into the natural landscape with as little intrusion as possible. Kosak has strived to

Management companies holding on

By DEREK RICE

has been able to cut back

on his annual synthetic fer-

SANTA MONICA, Calif. and CHARLESTON, S.C. - Two financially troubled golf course ownership and management companies - National Golf Properties (NGP) and Golf Trust of America (GTA) - received reprieves of sorts in July from their creditors.

NGP, which has continued to push toward a merger with its largest tenant, American Golf Corp., despite pressure from shareholders, has reached an agreement with its lender, Bank One N.A., to extend the forbearance period on NGP's \$300 million credit line until March 31, 2003. As collateral, NGP granted mortgages and deeds of trust on its properties. The company has been in technical default
