

DON'T JUST SELECT ZERO-EMISSION VEHICLES.

SELECT A "GEM" OF A COMPANY.

Street-legal*, compact, reliable and affordable. Two-and four-passenger transports. Short-utility and long-utility beds. Global Electric Motorcars (GEMs) are zero-emission electric vehicles now available from DaimlerChrysler Fleet. GEMs are ideal for short-distance transportation and light-duty hauling. But there's more to our electric vehicle expertise than innovative products. These are world-class vehicles from a world-class company. We work with upfitters to offer popular specialty vehicles. All models are available with optional soft or hard doors. And Mobile Service and Extended Service Plans are available so that you can tailor your protection coverage and receive on-site repairs, should the need arise. That's why we say...

GET IN AND GO.

For more information, visit www.gemcar.com or www.fleet.chrysler.com or call 1-800-999-FLEET.

Golfers spend all winter obsessing about spring. With a dormant application, you won't.

Here's a little secret folks in the Snowbelt have known for years: The microorganisms in Milorganite hibernate during winter. So when you apply it in late fall, before the first snow, it won't start releasing nutrients until the ground thaws. You know, when the course is too wet and soft for heavy equipment. Which means your course will be better prepared for the wear and tear of anxious golfers. For details, visit milorganite.com or call 1-800-287-9645.

While Some Fertilizers Make It Seem Like You're Baling Hay,

Ours Is Saving You Bundles.

POLYON[®] controlled release fertilizers give you consistent long-lasting performance without surge growth, saving you time and money.

Most fertilizers perform well immediately after application. In fact, they work a little too well, often resulting in surge growth that keeps mowing crews busy and golfers complaining.

Only POLYON fertilizers have the patented polymer technology that provides gradual, predictable feeding for months at a time. This unique nutrient delivery system

means you can get by with fewer fertilizer applications each year, saving you bundles of money on materials, labor and equipment.

So, instead of cutting grass, start cutting costs with POLYON controlled release fertilizers. After all, your success is based on turf quality, not quantity.

Ask for POLYON fertilizers formulated for your area from Harrell's or Simplot distributors, or call Pursell Technologies Inc. at 800-422-4248 ext.7411 for a sales rep near you.

*We salute course builder Louis Miller,
long-time Pennncross specifier.*

Louis Miller, President,
Golf Development Construction, Inc.,
Louisville, KY

**“I love '50s rock classics, and Pennncross
is a rock-solid '50s classic.”**

In the early sixties, The Monarchs rock group reached number one nationally with *Look Homeward Angel*. The Monarchs are still playing gigs, and I still play bass for them as I did then. Pennncross was 8 years old when we topped the charts, and I'm pleased to say Pennncross still tops the charts as the best-selling creeping bentgrass of all time.

As a certified golf course builder for 9 years, I still specify Pennncross for 95% of greens I build or rebuild. Pennncross takes extremes of cold, heat, traffic, plus wear and tear of daily spiking and ballmarks. Plus, Pennncross adapts to various superintendents' management styles.

Why do I still specify Pennncross? It has been where other bents are trying to go.
