

Terry Buchen, CGCS, MG, is president of Golf Agronomy International. He's a 41-year, life member of the GCSAA. He can be reached at 757-561-7777 or terrybuchen@earthlink.net.

Travels With Terry

Globetrotting consulting agronomist Terry Buchen visits many golf courses annually with his digital camera in hand. He shares helpful ideas relating to maintenance equipment from the golf course superintendents he visits – as well as a few ideas of his own – with timely photos and captions that explore the changing world of golf course management.

WINTER SAND/SALT SPREADER STORAGE

The Western Ice Breaker Sand/Salt Spreader (\$6,000) is mounted in the bed of the 2002 Ford F-350 dump truck for winter ice and snow removal. When the spreader is not in use during the wintertime, it can be temporarily loaded, unloaded and stored by one person so that the dump truck can be used for other golf maintenance projects such as hauling stuff, towing the chipper and loading wood chips. Two 4x4x10-inch lumber are used to support the pulley assembly and one 4x4x8-inch lumber below to support the crank assembly that are mounted on the Sandstor topdressing silo frame, which has two Dutton Lainsson Co. model D12000A crank assemblies, 2,000-pound-rated pulleys and cables and the chains have threaded 2-inch hooks mounted to the factory-installed eye bolts on all four corners. The spreader is stored elsewhere during the growing season when the topdressing silo is in use. Jose Rodriguez, equipment technician, conceived, designed and built the lift working closely with Brett Scales, golf course superintendent, at the Navesink Country Club in Middletown, N.J. It took about 12 hours for installation and it cost about \$250 for parts.

MORE user-friendly.

We've done the research, and product labels have been registered to allow the products listed below to be applied without protective eyewear following dilution with water.* So the choice is up to you.

Making application of our products more flexible and user-friendly: just another way we bring you more where it matters most.

4-SPEED[®] XT COOL POWER[®]

HORSEPOWER[®] Quincept[®] TRIPLET[®] SF

More where it matters most.
