## the WILT that wasn't

12

### COVER STORY

- 12 THE WILT THAT WASN'T**  
Turfgrass pathologists set the record straight on bacterial wilt.

### FEATURES

- Career development*  
**18 TIME... AND MONEY... FLIES**  
As you approach the later years of your career it's prudent to evaluate and prepare for life's final act.
- Water management*  
**34 THINK BIG**  
GCI's Bob Lohmann explains how courses can be a solution to their communities' water mitigation problems.
- Turf management*  
**40 EARLY TO RISE**  
A short, warm winter means early *Poa* emergence. Superintendents discuss their strategies for coping.
- Turf management*  
**48 LIQUID ASSETS**  
Wetting agents get the most out of the moisture on your course.

### DEPARTMENTS

- 6 Teeing off**  
Reasonable minds
- 8 The Whiteboard**
- 100 Travels with Terry**  
Equipment ideas
- 104 Classifieds**
- 105 Ad index**

### COLUMNS

- 32 Irrigation issues**  
Brian Vinchesi:  
Apples and oranges?
- 46 The Monroe Doctrine**  
Monroe Miller:  
Sport's toughest (and best) ticket
- 70 Design concepts**  
Jeffrey D. Brauer:  
Design for maintenance
- 78 Outside the ropes**  
Tim Moraghan:  
What's in your bucket?
- 90 Game plan:**  
Henry DeLozier:  
The pursuit of greatness
- 106 Parting shots**  
Pat Jones:  
The hot tub of optimism

- Equipment*  
**72 CHARGING FORWARD**  
The latest models of electric and hybrid walk-behind greens mowers have superintendents buzzing over the benefits they offer.

- Tree care*  
**80 WEATHER MATTERS**  
This year's wild weather may have stressed golf course trees, leaving them more susceptible to a host of insects and diseases.

- Course maintenance*  
**86 BERMUDAGRASS CONTROL**  
In situations where Bermudagrass covers a large percentage of a given turfgrass area, complete renovation should be considered over selective removal.

- Disease management*  
**92 BATTLING BACK**  
Superintendents describe how they control Anthracnose and meet member expectations.

- Course maintenance*  
**95 FILLING THE VOID**  
Superintendents share their best-kept secrets for divot repair.

- Real science*  
**97 NEW CHEMISTRY FOR POA ANNUA ELIMINATION**  
In March, the Environmental Protection Agency approved a new post-emergent herbicide, Xonerate from Arysta LifeScience, which has shown to control *Poa annua*.
