HOW TO GET FIRED

This ain't the time to be monkeying around with job security. GCI gives you great employment insights from the best in the business!

FEATURES

Plant Health
30 FRIENDS WITH BENEFITS
Meet your new BFFs when it comes to grub control, though white grubs may disagree with the term "beneficial nematodes."

Plant Health
37 WHAC A GRUB
Aerification may allow you to more effectively control your white grub problem.

Course Profile
38 CAJUN SEASONING
Superintendent Scott Poynot perfects his recipe for a quality playing surface – the right combo of turf and soil that requires the least amount of labor and inputs.

Water Management
64 SOAK IT UP
Effectively moving water through your soil profile means not only healthier turf, but potentially lower irrigation costs.

Disease Management
72 TURF EXORCISM
The power of cultural practices compels you! A sound management program is the best strategy to cast out the demon possessing your Poa greens – anthracnose.

Real Science
79 MADE IN THE SHADE OR MUD IN THE SHADE?
Sunlight assessment is a key to success with ultradwarf Bermudagrasses.
