

## PRACTICE TEE DIVOT SIGN:

Explaining to golfers the proper way to take divots on a practice tee has always been a challenge for turf managers. This decorative sign was built using 2-inch-by-8-inch cedar planks glued together. The planks were then sanded with 80-, 120- and finally 220-grit sandpaper. The lettering was done with stencils and freehand marked with a pencil. A Dremel tool was used for the engraving. Two coats of enamel paint were used to color-in the wording and diagrams. Finally, the entire sign was varnished to protect it from the elements. The total cost for materials was about \$100 and it took about 24 hours to build it. Rick Bowden, superintendent, designed their own version of the sign after seeing a photo of one at Hawthorn Woods Country Club, Hawthorn Woods, Ill. And John Minorini, groundsman, built the sign at the Bob O'Link Golf Club in Highland Park, Ill.

## THE CLEAR CHOICE

### KPHITE® 7LP SYSTEMIC FUNGICIDE BACTERICIDE

**KPHITE 7LP** Systemic Fungicide Bactericide is proven effective against pythium, dollar spot, brown patch and fungal diseases. KPHITE is EPA labeled, pH neutral and is uniquely formulated to increase plant health and vigor.
