

Save Water & Reduce Irrigation Expenses!

RESERVOIR 50
Soil Hydro-Logics

RESERVOIR
DG Soil Hydro-Logics

Save Tons of Water with Soil Hydro-Logics Technology!

Here's the bottom line for your golf course. You can literally save millions of gallons of water and related irrigated expenses with the Soil Hydro-Logics technology in Reservoir DG and new Reservoir 50.

Reservoir DG is a dry granular product that lets you broadcast or make spot applications to address localized dry spots (LDS). It can be applied to greens without interfering with play.

Reservoir 50 is a new 50% active liquid formulation that is designed for easy injection into irrigation equipment.

Both products work by improving soil aggregation properties. This increases soil porosity and water infiltration. In effect, it "unplugs" the soil and allows more water in the soil profile. This soil activity also reduces evapo-transpiration, and minimizes nutrient and pesticide leaching by "loading" the soil profile with more water.

Reservoir DG and Reservoir 50 remain active in the soil for 3 - 5 weeks and then bio-degrades into natural materials.

Save water and money! Use Reservoir 50 or Reservoir DG. For more information, contact your local Helena representative.

New Reservoir 50 is designed for easy injection into irrigation systems.

The extremely fine particles of Reservoir DG allow application to greens without interfering with play.

- **Increases irrigation efficiency, reducing water usage by 20 to 60 percent**
- **Increases soil aggregation properties for greater soil porosity and improved water infiltration**
- **Remains active for 3 - 5 weeks**
- **Lowers expenses for irrigation-related costs**
- **Reduces leaching of nutrients and pesticides**
- **Bio-degrades into natural materials**
