• Web links get shortened when posted to Twitter, and most people won't click on a link without knowing where it leads. When posting a link or photo, be sure to add a description of your own, even if it's just a few words.

## THE KITCHEN SINK

Of course, there's more to social media than just Twitter. Here are a few of the other networks your crew or members might use, and how useful we think they are for superintendents:

### facebook

**Facebook:** Chances are good you already use Facebook, but have you thought about using it for course updates and helpful links to educational pages for your colleagues? Updating a status can include those, photos and videos, all of which can be easily uploaded from a smartphone. Facebook has been working hard to catch up to G+ in quick selection of who sees what content.

### LinkedIn

**LinkedIn:** Keeping things professional is what LinkedIn is all about. It's a solid communication tool for keeping channels open for career movement and advancement, since connections will be on a professional level.

**Google+:** What Google+ brings to the table is an unmatched ability to select who sees what you're posting by gathering your followers into Circles. If you're posting a weather update, it would be a perfect fit for your "Members" Circle; posting some turf photos to try and diagnose dollar spot? That's more apt for your Colleagues and Turf Researchers Circles. Google+ also gives you the ability to do instantaneous group chats with friends through Google+ Hangouts.

### Pinterest

**Pinterest:** The newest kid in class, Pinterest has gotten a following by creating a purely visual way to collect interesting content on the Web. So it's not the right place to post your daily weather updates – but it's perfect for the before and after photos of the renovation, or shots of happy golfers at your most recent event.
