

**NEW**

# ECLIPSE<sup>®</sup> 2

*Jacobsen's new ECLIPSE2 offers best in class quality of cut, industry leading productivity and customized controls.*

**Widest array of frequency of clip settings** – requires no tools and takes just seconds to change

**Control the speed** through the speed paddle or bale, allowing the operator to easily slow down for turns and return to normal speed when the turn is finished

Settings are accessed through password protected menu

Maximum mow speed up to 3.8 mph

**Lightest handle weight in the industry** provides adjustable height for comfort and ease of use

**Moveable power source** allows you to adjust the weight on the front roller for the fixed head unit and ease of turning on the floating head unit

**Superior tracking** with true automotive differential. Drives from one point versus two belts or chains which require adjustment to track straight

**Regenerative braking** for increased speed control

**Honda<sup>®</sup> engine** – industry proven reliability

**Patented true floating head** allows lowest heights of cut without scalping, even on the most undulating green

**ECLIPSE<sup>®</sup> 2 122F shown**

**On-board backlapping** minimizes down-time by allowing for quick and easy reel maintenance

**Classic XP<sup>™</sup> reel design** delivers the industry best quality of cut
