

WE PUT MORE INTO IT. YOU GET MORE OUT OF IT.

NEW ECLIPSE²

We put in password protected programmable controls so you can achieve a consistent cut regardless of operator.

We rotated the Honda[®] engine 180 degrees so you get better balance in turns and easy access to the pull-start.

We installed a true automotive differential so you get superior straight line tracking.

We increased the maximum mow speed to 3.8mph and added a 15-blade reel so you can be more productive without sacrificing quality of cut.

We engineered a counter-balanced handle so the cutting reel sits true on the turf when you grab the handle.

We installed regenerative braking so you can control speed when mowing.

We extended the mounting slots so you can adjust weight distribution to the front roller.

We put in our Classic XP reel with 15-blades so you get the industry's best quality of cut.

We put in our patented true floating head so you can cut the most undulated green without scalping.
