# Six micronutrients? That's major.

**Now's the time for Phyte-Off PLUS.**

Phyte-Off® PLUS combines the benefits of phosphite plant nutrition with six important micronutrients. Consider what that means. Improved turfgrass response. Enhanced stress tolerance. Remarkable recovery. And optimum micronutrient availability. All from one product. Phyte-Off PLUS has the flexibility to be applied as a stand-alone nutrient or tank mixed with other products. Either way, it's a major tool in the management of turfgrass stress.
