

EXCELLENT SIDE-SLOPE PERFORMANCE

NEW AR522™

Nothing clings to slopes like the new AR522™ contour rotary mower from Jacobsen. The machine's combination of SureTrac™ four-wheel drive traction and weight transfer control allow it to climb hillsides and glide over contours with ease. You can also rely on the AR522's five fully-floating TrimTek™ decks to provide excellent mulching results and a superior after-cut appearance. See the AR522 contour rotary for yourself – contact your local Jacobsen dealer today.
