## JULY, 1927

two inch hose is necessary for this system, and it always pays to buy the best.

I believe the system which is being installed on the golf courses in California is ideal.

Installing a fairway water system is an expensive proposition, and should be gone into thoroughly, before deciding which is the most practical system to install.

## Greenkeeping Record Sheets Offered

A GOLF course pay roll distribution and time record sheet worked out by Joe Roseman of the Roseman Tractor Mower Co., Evanston, III., is offered free to greenkeepers on request. A facsimile of the sheet is shown herewith.

The system is that the greenkeeper keep a small time book in his possession as his own individual record. This will be an ordinary two-week or semi-monthly time book with sufficient space for him to explain to his own satisfaction just what type of work each man is doing daily. When the greenkeeper goes home at night, or goes to his office if he has one at the club, he will record on this Pay Roll Distribution sheet the amount of time given on each classification of work. Then, at the end of the pay period he will balance his distribution with the summary at the upper left hand corner of the sheet, so that each pay roll will be so distributed that the greenkeeper, the greens chairman, the auditor, and the manager will know just how the money has been spent.

The cost of materials can also be inserted in this greenkeeper's report by the auditor or accountant and at the end of the year the golf club officials will know just what it cost to maintain their course and all the various classifications will be itemized.

Just look over the bags that are carrying your members' clubs. Most of them are disreputable looking and ready for replacement. They should be considered part of the golfing attire as well as a utility, and there's no reason why the pro who is a good merchandiser will let this opportunity for increased sales escape him.
