

## Quick Work— Gets the Worms— Helps the Greens

"JUST a word, commenting on your "ELECTRIC" Worm Eradicator which has been used at the Essex Fells Country Club most successfully. We have never had anything which has worked so quickly and with no harm to our greens."—**M. E. Winans, Chairman Greens Committee, Essex Fells Country Club, Essex Fells, N. J.**

"ELECTRIC" stimulates and fertilizes the turf while preventing worm casts. It also safeguards the turf from "brown patch" and discourages chickweed and many other weeds. Used by more than 500 clubs.

Each gallon of "ELECTRIC" Worm Eradicator can be diluted with 250 gallons of water, and covers 3,000 square feet. Two gallons will treat an average green. Price, \$3 a gallon; shipped in 5, 10, 15 and 50-gallon containers. We supply gratis, a measure and glass jugs for handling the Eradicator.

We supply the 50-gallon Sprinkling Cart, shown above, at cost price, \$35.00 with orders for 10 gallons or more of the Eradicator.

Shipments made on approval.

the lines were too symmetrical, I made the sodding break down over the edge in jagged points, blocks of sod and irregularly picturesque effects with ragged lines that set off the green wonderfully.

Short posts with ball washers with the yardage on their sides and located at the end of the stone settees eliminate sand boxes, etc., in these days when patented tees are almost invariably used, and make for a great improvement in the appearance of our large tees.

### Work on Rough

We are trying to eliminate clover in the rough bordering the fairways, where balls go out most often, by removing the sod on strips 20 yards wide from 125 yards to 225 yards from the tees. This sod is dumped in a long flat pile three feet deep, then covered with several loads of cow manure, poultry manure, seaweed and 20 tons of sand, with seaweed to keep the sand from blowing off. This immense compost heap can be pulverized with the Fordson tractor and double disc harrow. This saves a large part of the manual labor of forking it over. These de-sodded strips have been seeded with sheep fescue so that the sparse, wiry grass will not hide a ball. The success of this experiment will have to be reported later.

## Pittsburgh Has New Golf Equipment Dealer

GOLF Equipment Co., House Bldg., Pittsburgh, Pa., has been organized by A. H. Krigger and associates to carry a full line of golf course equipment and supplies. The company has a repair shop at 2428 West Liberty ave.

## Tractor Wheel Spuds

THE R. H. Square shoulder spuds are made in many sizes and will fit any type tractor. The low price and quality has been welcomed by golf course managers. Sample spud and circular on request; advise make of tractor used. (If your local Dealer cannot supply you, write direct).
