

One of the smaller machines at work

## "FRIEND" GOLF COURSE SPRAYERS

Large—Medium—Small

Double compartment tanks. For fairways, putting greens, trees and shrubs. A fast, effective method of eradicating Golf Course pests, and for the application of liquid fertilizers.

"FRIEND" MFG. CO. GASPURT,  
N. Y.

## 50 Machines That Save Labor

Selected By J. O. DAHL

THE following table lists the 50 labor saving machines used in most quantity kitchens. This list was compiled for the book "Kitchen Management" (by J. O. Dahl, published by Harpers).

The figure following each listing indicates the number of meals per day that must be served to justify the use of that machine in a quantity kitchen:

Equipment recommended	Meals per day
Dish-washer	25
Food-mixer	25
Butter-cutter	25
Spice mill	100
Meat-slicer	200
Can-opener	25
Egg-timer	100
Potato-peeler	100
Silver washer	200
Water-softener	200
Vegetable-slicer	50
Fruit-juice extractor	50
French-fry cutter	50
Time clock	100
Fruit-corer	200
Scales	25
Pressure-cookers	50
Potato-masher	100

Potato-cutter	200
Doughdividers	500
Mop wringer	25
Sink pumps	25
Electric ice-cream freezer	200
Ice-cream machine	200
Food or dish conveyor	200
Automatic refrigerator	25
Meat grinder	25
Bread-slicer	100
Food-chopper	100
Cream-dispenser	100
Coffee mill	25
Automatic toaster	25
Soap-feeder	100
Incinerator	100
Ice cuber	200
Knife-cleaner	25
Knife-sharpener	25
Potato-parer	100
Cherry-stoner	200
Apple-peeler	200
Urns	25
Steam kettles	100
Bread-crusher	200
Cheese-grater	200
Trucks	200
Mopping trucks	25
Steam tables	100
Cake-filler	200
Ice-breaker	200
Paper baler	200

## Only the 19th Can Be a Wet Hole On the Poroswall Golf Course!

INSTANTANEOUS drainage is what is wanted on modern golf courses, not drainage that becomes effective 36, or 24 or even a few hours after every heavy rain. Today's golfers want their golf all the time and only "Poroswall" can insure that.

"Poroswall" does so because every square foot of its wall-area drains water and also because it is rigidly and permanently laid with perfect, tight joints producing straight, smooth flow-lines offering no obstructions. And "Poroswall" is strong, far exceeding the requirements of the American Society for Testing Materials.

"A Foot of  
Drainage for  
Every Foot  
of Pipe."
