

TREE TRUNK BURNS RUBBISH

New York City.—Concrete tree trunk incinerator made by Municipal Products Co., 2511 Grand Central Terminal building, is a substantial and lasting rubbish incinerator of waterproofed, steam-cured and hardened concrete designed and colored to resemble a tree trunk. It made its bow as a handsome utility for outdoor playgrounds in the park fields, being standard equipment with the New York park system and other municipalities. Golf courses took to the proposition quickly and now a number of the better courses in the east and central states are using the device with satisfaction.

Manufacturing plants in various sections of the country now are turning out the incinerator so the makers say they have the freight problem licked. Full details of the device will be supplied by the makers, on request.

Waterweeds removed easily and effectively from any lake, pond or river. Write for particulars.
