

## FIVE YEARS OF SUCCESS

### Stop Brown Patch, Destroy Clover, Kill Angle Worms USE TONAGREN

Tonagren No. 1 is a scientific product that is used on many of America's finest golf courses. It has a double acting effect that destroys clover and stops brown patch. Tonagren No. 2 is a splendid preparation used to destroy angle worms.

The use of these two products will insure perfect playing greens throughout the season.

# PERFECTION SPRINKLERS

## DON'T BE MISLEAD

Improvements have been made in sprinklers, the same as in other equipment. Sprinklers that were considered "good" only 4 years ago are now out of date.

The new Patented Perfection Spray Disc Nozzle has revolutionized irrigation. This new nozzle assures perfect distribution and constant slow turning whether the pressure go up or down.

And, incidental to these unparalleled achievements, came larger coverage, longer life and simpler, more fool-proof construction.

Perfections are cheaper, too, from only \$7.50, giving a coverage up to 75 ft., to \$14.00 for the new No. F15, for a coverage up to 120 ft. circle.

NOW is the time for you to find out for yourself what Perfections are really like.

DON'T DELAY—Write us today—Tell us if your pressure is high, low or medium, and we will be glad to send you a Perfection on 10-day free trial, subject to your approval.

Plymouth Michigan

# DO IT BEST

## Green Section Bulletins Discontinued for 1934

**A**UGUST, October and December, 1933, issues of the *Bulletin* of the Green Section of the USGA and Index for 1933 have been issued.

There will be no *Bulletins* during 1934 due to lack of funds. Clubs failed to keep up USGA membership to extent necessary to finance Green Section *Bulletin* publication and to continue much of the other vastly important work of the Section.

Any of the clubs that have not belonged to the USGA and paid the \$30 annual dues are advised to see if they can get their hands on the October and December, 1933, Green Section *Bulletins* especially. They contain some technical articles that are worth so much more than \$30 a year to at least 3,500 golf clubs it's mystifying the clubs don't grab at the bargain.

Green Section advisory service for 1934 will be confined to member clubs of the USGA, giving them easily more than a \$30 a year edge in maintenance over non-member clubs.

## Waffle Iron Brush Makes Excellent Boot Cleaner

**P**ARTIALLY dried mud and caked dirt is a mean thing to readily remove from shoes. A broom or the usual stiff brush will not satisfactorily make the grade. The unavoidable covering of soil is often at-

tacked with sharp, clumsy tools which damage and injure the leather and strings. Get common ten-cent waffle iron cleaners and keep them handy in the tool house for the greensmen and the valet room for the members' shoes.

The steel bristles on these cleaners nicely spread out, but are stiff enough to remove practically any kind of mud or dirt which has dried. They are, however, pliable enough not to cut or injure leather.
