

solves the cell walls of the grass leaf and then absorbs the grass juices into its own body, thus robbing and killing the grass plant.

Associated with several fungus parasites of fine turf grass are small, hard bodies known as sclerotia that consist of a tightly woven mass of hyphae. These hold the fungus over during adverse weather conditions and many are to be found near the top of the soil, particularly in fine turf grass areas. When atmospheric conditions become right for the fungus, these sclerotia unwind from their tight, ball-like mass, and hyphae grow out in all directions in search of tender grass for food and sustenance.

THE club that hasn't a canopy of wood or canvas over its lesson and practice tees is neglecting to supply members with an inexpensive comfort. Spring showers and blistering summer days this year have emphasized need of these practice tee canopies.

Clapper Cracks Ribs.—Orville Clapper, manager of New England Toro Co., recently stumbled over a fairway mower in his warehouse. Three broken ribs for Orville. Mowers lived up to their reputation for durability.

GOLF'S MARKET PLACE

International Harvester Co. has introduced a completely new line of trucks, many of the 26 new models being especially suited to the requirements of country clubs. Prior to approval of the designs for the new lines, hand-made experimental trucks were subjected to brutal high-speed tests in the Tennessee mountains and the rough "washboard" clay backroads of

Showing a solid length of Bent turf to illustrate its toughness and strength, made possible only by proper preparation of soil.
