

has failed when co-operation would have won the battle.

When analyzing your ground crew, remember some men get their work done with less effort than others. Also, there is a great difference between mental and physical fatigue, and both have a breaking point, so let us not pass opinion too hastily when we see the working man relax. He may appear to be stalling and still be on the job.

It is hard to measure work on a golf course. I don't believe it can be done, for there is no end to it. Abe Lincoln once said, "There is always a job for the man who wants to work," and this goes for the golf course, too.

Ohio Superintendents Hold Annual Spring Demonstration

OHIO Association of Golf Course Superintendents held its annual spring demonstration and dinner at Canterbury CC, Monday, May 17. A crowd of almost 200 attended, witnessed field demonstrations of leading manufacturers' maintenance equipment and took part in the dinner session.

Don Boyd, president of the association,

presided at the dinner. Dr. John Monteith, jr., handled a lively and informative question box session. Spencer M. Duty, veteran green-chairman, lauded the work greenkeepers had done in bringing golf courses through the depression. O. J. Noer gave highlights of his observations of spring work at golf courses. Herb Graffis spoke on the current labor situation as marking the avenue for the next scientific development in greenkeeping, that of expert study of labor management and costs.

Outside Contributions Talked for Green Section

THERE is renewed talk about permitting contributions from non-member clubs of the USGA toward financing Green Section work. It has been pointed out that the government has spent more than \$10,000,000 in construction at public courses but has allotted no money for maintenance problems. Only about one out of five golf clubs belong to the USGA and help finance Green Section work that has been tremendously valuable in bettering course condition and reducing risks and unnecessary expenses.

Cemeteries, parks, polo fields, tennis courts and private lawns have benefited from Green Section work, although sharing no part of expense of the Section's research.

Opening the list for contributions from beneficiaries of the turf culture work under direction and management of the USGA is considered by many to be the one logical manner of eventually securing funds sufficient to finance the work demanded of the Green Section.

Forecasts Munny Play in New York Area 125,000 Rounds Over '36 Total

CCHEERING news comes out of the New York district where John R. Van Kleeck, golf supervisor, speaks for the municipal links golfers of the District. Van Kleeck predicts a total of 575,000 rounds of golf will be played over the ten municipal links before next fall which is an increase of approximately 125,000 over the 1936 figures. And the 1936 figures were approximately 125,000 greater than the year previous, so that ought to give you some idea of the upswing in golf expected in the East this year.

Something else calls for a big smile in looking over 1937 prospects. Van Kleeck

Roundup

BROWN PATCH

with FUNGOL

SAVE YOUR GREENS AND BANK ACCOUNT
 WITH THIS
 POWERFUL FUNGICIDE AND VERMICIDE

There is something in Fungol you cannot get in any other fungicide. It has chemical value not otherwise obtainable at any price.

Fungol is definitely an economical specific for Large and Small Brown Patch, Snow Mold and other fungous turf diseases.

Go where you will, there is no other similar product that gives the big covering capacity of Fungol—3,500 to 7,000 square feet of Green to the pound.

And then you don't pay a cent extra for the vermicidal features of Fungol, that abolish purchases of separate chemicals for control of Earthworms, Sod Webworms, Cutworms, Grubs, etc.

These are all mighty big saving items to reckon with in your expense account.

Write for special literature and free testing sample of Fungol.
