Two weeks after the PGA tournament, no one will know from the condition of the Hershey championship course that a major tournament was played over it, so Morrison maintains. He is of the opinion that the damage a major tournament does to a course is by no means as extensive or serious as many golfers believe.

Play at Hershey goes well into November, due to favorable weather and the work done in cleaning up the woods that border many of the Hershey holes. Seeding is a major item on the Hershey course September schedule for there's generally favorable growing weather until mid-November.

Morrison makes an important detail of his autumn work that of seeing that the men he can't keep on during the winter get other work around town. He is firm in the belief that a not inconsiderable amount of the expense and uncertainty of course maintenance work is caused by the frequent necessity of having to take on new men when the spring rush begins on courses and the infrequent opportunities afforded to train these men in numerous phases of maintenance work which require an experienced and skilled performance.

**Club's Record Keeping Is Model**—Corpus Christi (Tex.) G&CC, makes an annual financial statement that is a model job in telling the story of the club's operations and conditions. Assets of the club are \$134,779.77 and there's a conservative expectation that in 3 years the club will be able to retire all of its debt. Right now the club is averaging monthly more than \$700 from oil wells on its property. Even with this monthly figure reduced to \$500 monthly the club will be completely out of hock in 1942. Despite the added income from oil the organization continues to operate its plant on a thrifty basis.
