

MAINTENANCE MATTERS (As Seen By A. J. Noer's Camera)

(Top left)—Here is a heavy infestation of buckhorn in the rough, while nearer the fairway (top right) it has been eliminated through two applications of sodium arsenite by the dry method, Milarsenite. (Center left)—Homemade mechanism of sash pulleys, rope and steel rod between levers operates shut-off on farm-type spreader. (Center right)—Home-made scatter-board of 1 in. by 2 in. strips, covered with $\frac{3}{4}$ in. screen, then by window screening. (Bottom left)—Construction details, attaching Del Monte rake to Overgreen. (Bottom right)—Rye grass clumps in spike holes on thickly-matted Bermuda fairway.
