## Look To Future in Your Clubhouse Planning

In new clubhouse planning, design and construct the heating plant, the ventilating plant and kitchen so they can be revised to accommodate any increase in business that may become solidly established in the future.

The possibility of country clubs getting more on a year-round operating basis looms larger each season.

And, profiting from mistakes of the past, attend more to attractive quarters for employees to be able to secure and retain desirable workers at the club.

FRED L. WOOD,

Mgr., Lakewood Country Club,  
Denver, Colo.
