How you can attract More Customers and More Money to your DRIVING RANGE

U. S. Driving Range Balls are designed and built to rigid specifications. To stand the terrific beating that a driving range ball must take, U. S. Rubber has experimented, tested and built a special range ball that has proved its quality for years.

A "cheap" product is never satisfactory or economical. "U. S." range balls are more economical than seconds, or ordinary balls sold at lower prices. They are a better buy than old, discontinued, reprocessed or repainted balls sold at "bargain" prices.

"U. S." offers the most complete and varied assortment of distinctive markings, together with first-quality golf balls, more durable covers, and a whiter, longer-lasting paint job.
