

order to obtain the maximum quantity of material. By this method you will be able to plant fresh material at the time of your choosing. Be sure to roll the cores down firmly and keep them moist at all times until well rooted.

Q—We have been advised to use Dieldrin on our bent greens. Do you know of any reason that this material might be harmful? (Vt.)

A—We know of no evidence that would make it necessary to issue any warning against the use of Dieldrin on bent greens. Sometimes, injury may occur when an oil carrier is used but then the damage would arise from the carrier and not the insecticide.

Q—We have piles of sawdust all through the woods near our course and we can get it for the hauling. Will it be all right to use this as a source of organic matter in our greens? (N.C.)

A—Sawdust is a good material for incorporating into your greens as a source of organic matter, for conditioning the heavy soil and to help hold a shot. Neither the kind of sawdust nor the age of the material seems to be very significant so

long as you use enough nitrogen to feed the organisms that attack and break down the sawdust.

Yellowing of the grass in connection with use of sawdust usually means lack of nitrogen, not acidity necessarily. Limestone added will help to decompose the sawdust. A rate of 25 lbs. of dolomitic limestone to 1000 sq. ft. usually will be adequate whenever sawdust is used.

Q—We have some strains of Bermuda that throw seedheads, even under putting green conditions. They are unsightly and they interfere with putting. What can you suggest? (Ala.)

A—The old method used to be to hand-rake and mow closely and then cover with topdressing. In this mechanized age we eliminate seedheads and the bumpy putting with vertical mowing equipment, used frequently to keep them under control.

Frequent, heavy feeding with nitrogen-carrying fertilizer helps to keep the grass growing vigorously in a vegetative state with fewer seedheads. It may be that you should check the phosphorus levels in the soil and, if phosphorus is high, reduce phosphorus feeding for a considerable

THE WORLD'S CHAMPION OF THE LIGHTWEIGHT BAGS
