Stewart, irrigation engineer of Homewood, Ill., reports that he has contracts calling for the installation of complete water supply systems at the following courses: Timuquecana CC, Jacksonville, Fla.; Blue Mound CC, Milwaukee, Wis.; Ridge CC, Chicago; Olympia Fields No. 4, Chicago and Oak Ridge CC, Minneapolis, Minn.

### Greener, Healthier Turf Credited to Use of Fast

A new mineralized plant food which is said to produce greener, healthier greens and fairways is being distributed by Vital Earth Corp., 1 E. 35th st., New York City. The product is being marketed under the tradename, Fast.

A by-product, Fast is a new form of ferrous ammonium sulfate containing 7.5 per cent nitrogen, 12 per cent iron plus 11 trace mineral elements. The product has been thoroughly tested by a research institute and the distributor claims that within a couple hours after application it will give grass a greener tinge and in less than two days has transformed brown, scorched grass to a lush green.

Fast is said to be the first combination of metals in an instantaneous water soluble form that can readily be assimilated by leaves and roots. Several supts. of clubs in the East and South report they have used Fast with exceptional results.

**Hoff Named Wilson's  
Assistant Ad Director**

Harty Hoff has been named asst. advertising director of Wilson Sporting Goods Co., according to an announcement by Bob Wren, director of advertising and public relations.

Hoff joined the Wilson organization in 1952 as a member of the Chicago sales division. He was transferred in 1953 to advertising as head of dealer service, and subsequently became asst. production mgr., the position he held until his recent promotion.

A native of Los Angeles, Calif., Hoff attended Pacific Lutheran College and studied at the University of Washington and University of Iowa. He joined Wilson immediately following the completion of his collegiate career.

**Turf Specialist Prefers Chopped  
to Long Runner Stolons**

Touching on the subject of chopped versus long runner stolons, Ralph R. Bond of Old Orchard Turf Nurseries, Madison, Wis., in a recent bulletin said that the chopped variety are preferable to long runner for a number of reasons. Among them, he lists the following:

Chopped stolons give more nodes per bu; are easier to spread while planting and give more even distribution; there is a 50 per cent savings in topdressing; chopped stolons do not have to be torn apart, lay flatter on the ground and do not blow away as readily while roots are anchoring. Bond points out that chopped stolons mature more quickly, adding that greens are ready for play in about eight weeks when they are used.

Old Orchard Turf Nurseries, it is emphasized, supplies both chopped and long runner stolons.

**Grau Gives Instructions  
for Ordering Ugandagrass**

Fred V. Grau, PO Box 177, College Park, Md., advises persons interested in W & G Ugandagrass to give the supplier two weeks' notice of planting date in placing orders. Since sprigs must be quite dry to insure safe shipping, there is a chance that weather can delay shipment by as much as one week.

Two or two and one-half bu. of Ugandagrass will plant 1,000 sq. ft. which is ready for play in about one month if all growth factors are favorable. It is suggested that supts. take the precaution of not overwatering the grass after it is well started. Ugandagrass should be kept moist for the first two weeks of growth, and after that, watered only as needed.
