holes was selected through his playing shots to where he thought the greens should be. In addition to the 18-hole course, Ross plans to install a practice fairway and 18-hole putting green on the north side of the clubhouse.

The addition of the Pequot club is another help in solving the crowded course situation in Connecticut. Membership will be drawn from golfers in Norwich, New London and Westerly, R.I.

Ross will be pro-greenkeeper at Pequot.

Burton C. Rowley of New Canaan, heads the corporation which purchased the Pequot property. A. P. Culver of Jewett City is the contractor and Arthur Priore is Ross' assistant.

Research Usefulness Shows In Course Condition—Lilly

David M. Lilly, Pres., Toro Mfg. Co., Minneapolis, says: "Golf may expect, in 1957, a continuation of the very definite progress in the use of turf research that marked 1956.

"Last year was featured by especially fine course conditions not only because of generally favorable weather but because there was wider application of the newly developed sound management policies and practices.

Snowmold Controlled

"One of the more important advances in 1956, as far as Minnesota is concerned, was the new technique for controlling snowmold. The increasing use of improved grasses, development and application of sound fertilization, watering, aeration and mowing practices, along with adequate disease, insect and weed control programs, contributed materially to better grooming and conditioning of courses. While plenty of mystifying maintenance problems remain the supts' exchange of information on progress they have been making will reduce the number and severity of continuing troubles."
