### Northrup, King & Co. Markets New Crabgrass Killer

What's said to be a new heavy weapon in the war on crabgrass is available. This powerful new dry crabgrass killer is called Crab-X, and is a product of Northrup, King & Co., 1500 Jackson St., N. E., Minneapolis.

Crab-X uses disodium methyl arsenate formulated on specially treated vermiculite to make it lightweight, easy to handle and apply. A 9 lb. bag will treat 2,500 sq. ft. No mixing or preparation is required. In fact, using an NK Lawnspreader, an average lawn can be treated in less than five minutes. Crab-X was developed to effectively kill old and tough crabgrass plants as well as newly sprouted seedlings. It also is said to control many other annual weeds including smooth and hairy crabgrass, yellow foxtail, young goosegrass, barnyard grass, witchgrass, and green foxtail.
