quick recovery from injuries and makes them tolerant to close mowing. Colonials do not thatch as readily as the creepers.

Most commercial seed is contaminated with creepers and susceptibility to disease, especially brownpatch. It must be realized that no improved types exist and our knowledge of the species is limited.

U-3 Bermuda and Meyer zoysia are now being accepted as a practical approach toward solving the perplexing question of fairway and tee grasses in the 'no man's land' area between our northern and southern climatic zones. The decision was undoubtedly reached only after a fair trial was given to these grasses, and due credit must be given to those individuals who pioneered the effort by abiding by the principles of good turf

management and rational thought. Trials consisting of "just plugging these grasses and waiting to see what happens" contributed very little practical information.

Musser Text Revised

"Turf Management," has been revised and brought up to date by its author, H. B. Musser, professor emeritus of Pennsylvania State University. It soon will be published by McGraw Hill Books, Inc., for the USGA green section.
