

"Profile" Styling Highlights Bags Made by Hinson

The 1961 line of golf bags made by Hinson Mfg. Co., Waterloo, Ia., features "profile" styl-

ing. Clothing, ball and accessory pockets have been contoured to the shape of the bag itself. All bags made by the firm are of lightweight Hinsolon vinyl plastic with leather trim, and all have round bottoms of cycolac, a high impact thermoplastic. Ten color combinations are available. Matching tog bags and shag bags also are made by Hinson. The Pro model (7993) has built-in stow-

away umbrella and putter sleeves while features of other models include either a 14-club Uni-vider with compartments for each club or a three-compartment Tri-vider.

Tri-Powered's "Tee Birdee" Comes in Electric, Gas Driven Models

Just coming on the market is "Tee Birdee," available in electric or gas driven models. The cars are being designed and built by W. L. Bales, pres. of Tri-Powered Corp., Austin, Tex., the firm that produces them. Features of the new models include: 2½ gal. fuel capacity (a full golfing day's supply); Spicer Automotive differential assembly; Muffled intake and exhaust; Automatic transmission; Oversize acceleration pedal; 7 hp Kohler engine; Continental style body that is said never to need paint; Wide base 6½ in. rims for weight distribution that

spares turf; Four interchangeable springs (coil) plus new suspension that is said to give an effortless ride. Eric Wahlquist is sales dir. of the Tri-Powered Corp.

Big Improvement in Tee Mats

H. M. Wise, 212 Helen ave., Mansfield, O., has introduced what it claims is the greatest improvement in Tee Mats since they were introduced to ranges. The 10-in. Magic Fluff driving section is attached to solid rubber end strips with a special link weave in the center. No clips are used and the mat will not curl at the ends or corners. Tee Mats come in standard 4 x 5-ft. sizes or special sizes. Model A weighs 70 lbs., Model B, 100 lbs. Model B is available in special construction for use with mechanical tee machines. The patented 'Fluff' is said to practically eliminate all scuffing and staining of balls and clubs.

Gripdust for Easy Mopping

Gripdust, manufactured by C. B. Dolge Co., Westport, Conn., should ease the dusting problem in pro shops, clubhouses, etc. The product is contained in a 16-oz. aerosol and it is only necessary to spray a mop or cloth with it to put

it to work. It dries instantly and there is no diluting or soaking in preparing the mop or cloth. Gripdust picks up dust as if magnetized and it has a pleasant aroma.

Typhoon's "Air-Flo" Blades Give Grass Level Cut

Ransomes Sims & Jefferies, Ltd., Ipswich, Eng., has fitted its new 18-in. Typhoon rotary mower with upswept tip "Air-Flo" blades that

create a strong suction effect that brings grass erect for level cutting. Turbulence created by the blade also gives clean ejection. Wheels on the Typhoon are inset to permit cutting to within 1/2 in. of trees and obstructions. The mower is powered by either a Clinton 2-stroke (94cc) or 4-stroke (117cc) engine fitted with recoil starter and air-vane governor.

Tri-State Toro Co. has moved to larger quarters, 518 Harrison st., Davenport, Ia., according to Bill Stafford, pres.

TURF that Speaks for Itself! **The Gerbers Are Perfectionists**

One seldom, if ever, finds anything but perfection at Ray's Glen Oak or Don's Chicago Golf Club courses. Both father and son are noted for keeping their members happy.

Ray is a leader in the superintendent's profession. He is a past president of the National and has held this office and others in the Midwest group. Closely following his father's dedicated approach, Don is currently Secretary-Treasurer of the Midwest Association.

Stressing the "big little things" neglected by some, both courses exemplify good grooming through-the-green. Naturally the turf is excellent always. Both men rely on MILORGANITE to get and keep it that way.

If you have a Turf Problem, consult the Turf Service Bureau,

THE SEWERAGE COMMISSION, Milwaukee 1, Wis.

Here is the Wm. Joyce El Dorado golf shoe for women, custom made by Bowen of Pasadena, Calif. It is of white French calf with alligator wedge and strap and has polka dot lining.

Use Tractor Combination for Backfill Tamping

Muellermist Irrigation Co., Broadview, Ill., used the weight and the powerful hydraulic system of an International 340 Industrial tractor

to compact a backfilled ditch following installation of a watering system at Ravisloe CC, Homewood, Ill. Wheel brakes allow the tractor to be steered when the front wheels are off the ground. The wheel and tractor combination, according to Muellermist, was 25 per cent less expensive than tamping. At Ravisloe, 14,000 ft. of 8-in. pipe and some 12- and 15-in. pipe was installed.

AMF Pays \$3,000,000 for Hogan Golf Company

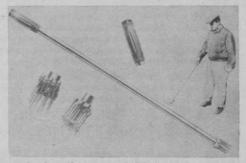

American Machine & Foundry Co. of New York paid approximately \$3 million for the Ben Hogan Co., Ft. Worth, according to reports. The sale was effected through a transfer of AMF's stock in exchange for Hogan Co. assets. Acquisition of the Ft. Worth firm is a significant extension of AMF in the leisure-time field. Besides golf it now has interests in bowling equipment, skin diving equipment, bicycles and engine-powered toys. Hogan will continue with AMF in design, development and sales promotion of the golf line and Edward P. Rankin will stay on as general mgr. of the golf div. The Hogan Co. was organized in 1953.

Late in Dec., pros throughout the U. S. received a letter from Carter L. Burgess, AMF pres., telling them that the Hogan company policies will continue to prevail. Burgess pointed out that AMF has a big stake in the leisure time field since it produces bowling equipment, basketballs and footballs, and skin diving equipment and it expects to gain a firm foothold in golf with the help of the pros.

Ernie Sabayrac, Inc., Hialeah, Fla., will continue to distribute the Hogan line products.

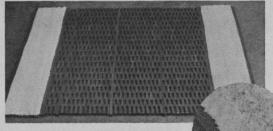

Improved Litter-Picker

Rowco Mfg. Co., Inc., Keene, N. H., has recently introduced a manually operated Litter-Picker. It has a 38-in. aluminum shaft that spears

all kinds and shapes of debris. Slight pressure on a spring-action handle completely clears prongs and ejects the litter into a container.

Toro Enters Car Field with Two-Cylinder Golfmaster

Toro Mfg. Corp., Minneapolis, a leading producer of mowing equipment, has entered the golf car field with the introduction of the 10-hp Toro Golfmaster. The car is powered by a 2-

cylinder Onan gas engine, specially insulated for quiet operation, and has an auto-type electric starter. It has been in the developing and testing stage for three years, according to Robert Gibson, vp. The car is said to be capable of

climbing the steepest course hill and goes 18 holes on a gal. of gas. The frame is of heavy welded steel and the body is of 20-gauge reinforced welded steel insulated with glass wool. The car rides on aircraft type tires. The Golfmaster is designed so that it operates only when the accelerator is depressed. Leasing and financing plans are being made available, according to Gibson.

Taylor Promoted by Wilson

Edwin C. Taylor has been named sales div. mgr. of Wilson Sporting Goods Co's Philadelphia branch. He was formerly sales mgr. of the Phila. div. He started his career with Wilson in 1937. Taylor played pro basketball from 1930 to 1942 in the Eastern League.

Electric Washing Machine for Golf Clubs

Hilmac Corp., Box 650, Sheboygan, Wis., is marketing the Club Cleaner, described as an electric club washing machine. Powered by a

% hp, 110 volt motor, the cleaner scrubs dirt and ball marks quickly from woods and irons. It has nylon brushes, separate access doors for woods and irons and internal illumination. Club Cleaner is available in a bench model, ideal for pro shops, and a coin operated model for ranges, semi-private and public courses.

Changes in Plymouth Staff

James G. Hogg, pres. of Plymouth Golf Ball Co., Plymouth Meeting, Pa., has announced the following additions to and changes in his firm's staff: Bob Jones is now in charge of pro sales in the Mid-Atlantic area; David Campbell, former senior accountant with Main & Co., is company controller; William Whitaker, former production mgr. has been appointed vp, manufacturing; and Joan Russell has been named seey.

Borm Markets New Type of Putter

Borm Mfg. Co., Big Timber rd., Elgin 6, Ill., is marketing the new Mark-N-Putt with a patented built-in marker. A simple tap on the green leaves a white spot to mark the ball's position. As a club, the Mark-N-Putt is said to be expertly balanced. It

comes in short, medium and long shaft lengths.

Comptometer Firm Purchases Worthington Ball Company

Sale of the Worthington Ball Co. of Elyria, O., to Comptometer Corp. of Chicago was approved by Worthington stockholders early in Nov. The purchase, price not announced, was accomplished by a cash consideration. According to J. A. Schram, Comptometer pres., the Elyria plant will continue to produce the complete Worthington line of balls including the Sweet Shot and Les Stroke. Last year the plant had an output of more than 12 million balls. When announcement of the sale was made, Schram pro-

She is shown at the unveiling with William P. Holmes, Wilson pres. Since joining Wilson, Patty has won 82 tournaments and more than \$140,000 in prize money.

moted L. R. (Red) Barton to executive vp in charge of sales and said that all employee benefits, then in force, would be continued. The Worthington div. will continue to be operated under the direction of R. F. Smith and Myron E. Foote.

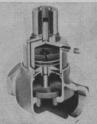

Thomas Develops Unique Jacobsen "Sound" Course

Roger J. Thomas, commercial products mgr. of the Worthington Div. of Jacobsen Mfg. Co., Racine, Wis., has developed a "sound" problem solving course that has been presented to several major gatherings all over the U. S. It is based on tape-recorded sounds of equipment that requires service and is supplemented with slide film showings. Of 45-minutes length, it will be presented by Jacobsen sales engineers in their territories and will be heard and seen at the company's service school programs.

Flexibility Is Feature of Febco's Remote Control Valves

Remote control valves made by Febco, Inc., 1993 Blake ave., Los Angeles 39, are extremely

flexible when used in automatic sprinkling systems. In use they normally are closed, opening when actuated by an automatic controller and re-closed at the end of a prescribed period. A manual override gives independent control at the valve location. Febco No. 25 is automatic-

ally actuated by a hydraulic pilot tube, while No. 1825 has a solenoid controlled by simple wiring from an electric timing device. Both are made of rugged bronze, have 0-ring seals and a single moving part with renewable composition disc. Rated capacity is 150 psi at 150 deg. F. Sizes range from 1 through 6 ins.

Truckster Mounted Sprayer Has Numerous Uses

A low cost spraying method for killing mosquitos and other insects, utilizing a portable sprayer mounted on a Cushman 780 Truckster, is being widely used. The sprayer, weighing 650 lbs. when the tank is filled, is mounted on skids and slid onto the Truckster. The combination can be used for water painting, weed spraying and fighting fires as well as for insect control. The Truckster has numerous uses around a course, carrying loads weighing up to 800 lbs.

Toro Introduces New Maintenance Fleet Financing Plan

Toro Mfg. Corp., Minneapolis, has introduced a fleet financing plan that eliminates heavy initial investment for users of institutional power mowing equipment including golf courses. The

The hydraulic unit above is covered in Toro's financing plan.

financing can be obtained either through Toro or its distributors in U.S. and Canada working with the C.I.T. Financial Corp. The plan is set up so that even the largest mowing equipment can be obtained for as little as \$200 a month. Users, such as courses, that need a variety of equipment for complete maintenance can obtain it for about \$400 a month. Rental rates are computed on 3.5 to 3.02 per cent per month on the base price for the first 40 months. Thereafter, the rate is \$3.00 a month per unit. The lessee can sell back his unit and call for its replacement at any time before or after the 40month lease period. Complete details can be obtained either from Toro or its distributors.

Available for Clinics

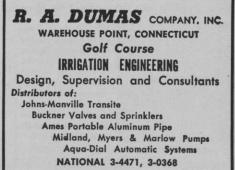

Nello Cammalarie, a Chicago dist, pro for more than a decade, is available for teaching clinics. In the last year or so he has been engaged quite extensively in giving clinics through Illinois, Iowa and Indiana. These consist of about 30 minutes of demonstration and 1½ hours of individual instruction. He can be reached at 842 Ainslie st., Chicago 40, III.

Powered Products Distributor
