No Delay in Placing Penn State Turf Grads

Twenty four men were graduated from the turfgrass management winter course at Pennsylvania State University in mid-March and all were "on the job" within two weeks. This is not usual, says Fred C. Snyder, director of the school's short courses in agriculture. Records show that all but three of 82 graduates of the course, established in 1957, are in turf or related work.

Lavern L. Warnett of Center Valley,

Turf management students at Penn State shared \$1500 in scholarships this year. Gary J. Kwas, Lavern L. Warnett and DuWayne E. Laak (from left) received \$300 each and Leland S. Keck received \$400, all from the GCSA. Byron F. Knoll, Jr. (right) was awarded the \$200 Al Cooper scholarship by the Pocono Turfgrass Association.

Pa., graduated from this year's course with "highest distinction"; Gary J. Kwas of Milwaukee and DuWayne E. Laak of Waukesha, Wis., graduated with "high distinction"; and Byron F. Knoll, Jr., of Emmaus, Pa., graduated with "distinction." Bruce A. Sering of Chicago was master of ceremonies at the graduation exercises.

The Penn State turf management winter course consists of class and laboratory work in two eight-week terms a year in each of two years. The seven months period between the second and third terms is used for on-the-job training. Twenty-five new students are accepted each year for the course.

In order to be enrolled, applicants must be high school graduates 16 years of age or older. Individuals with prior turfgrass experience receive admission preference.

The adviser for the turf management winter course is Joseph M. Duich, associate professor of agronomy at Penn State. H. Burton Musser established the program in 1957 with the help of the GCSA.
