Digs Holes — Makes Money

While adding several small lakes to its course in recent months, Westmoreland CC, Glenview, Ill., realized a \$30,000 profit. According to Don Strand, supt., the course is underlaid by well weathered sand that makes a stabilized fill for construction projects. Sand removed from the lake sites has been sold to contractors for this purpose. It is used as a backfill in trenches in which sewers are laid and it also is used as a base in parking lot construction. Located near Lake Michigan, Westmoreland is built on a former lake bottom where sand was deposited.
