of the swing and the equipment. Something revolutionary in club construction may come out of their cerebrations.

There are limitations, however, as to what can be done with clubs, according to Wolfe. The diminishing return factor is an exorable one in club construction. For example, it was thought a few years ago that by lengthening shafts, especially those in the woods, more leverage might be realized. But weight and balance again asserted itself. Clubheads had to be made heavier to compensate for the increased length and weight of the shafts or swing weights were thrown off. Manufacturers came to the wise conclusion that pros might be able to effectively swing longer shafted clubs, but the average golfer can't.

When there is a temptation to tamper with the basic measurements or standards of clubs, designers first ask themselves how will it affect balance, and
