

bers; on the third floor, 10 staff rooms and Louis' apartment.

In the poolhouse space is provided for golf car storage.

Weekly meetings are held with the maintenance employees and everything is planned with the comfort and pleasure of the members uppermost in mind.

Louis would be the last man in the world to take all the bows for changing Muttontown from an ugly Long Island duckling into a Cinderella golf and country club.

"This was not a one-man job," he says, "and it still isn't. Keeping things shipshape requires the full cooperation of the officers, members and employees. We got that from the start and we're still getting it. We have the complete confidence of the board of governors and the house committees, and the full support, help and enthusiasm of Francis Zera, our head golf professional; Frank Zakovsky, greens superintendent, and the entire staff.

"But please don't refer to this as the 'Miracle at Muttontown.' Anybody with imagination, given full support, can do what we've done here."

## HOT SEAT FOR INSECTS

A new brochure is available from Zeropest Products Ltd., 4669 Kingsway, Burnaby 1, B. C., Canada, whose system of flying insect control utilizes the principle of Black Light to attract the insect to the equipment where he is electrocuted on a charged grid of wires.

Entomologists have proven that insect's eyes are focused to receive the shorter wave length, higher frequency light emitted by the units, thus creating a bright and attractive lure.

This system replaces the use of sprays and other chemical methods of control. Several models are available, and an engineering study for proper selection is offered by the manufacturer.
