

Buyer's Guide to 1966 golf clubs

Lost that brochure? Or perhaps one of your members interested in a particular set has "borrowed" and not returned it? Now what do you do to satisfy that query about the new, "Super-Duper" wedge put out by ABC Co.? That is just the reason GOLFDOM is offering this "Buyer's guide to 1966 golf clubs." Here in one handy package are the main lines being put out this year by the manufacturers of pro-line clubs. Whether your customer craves a new set of woods or irons, an extra utility club or a new putter, the distinguishing features of any club and its price are at your fingertips. (Addresses of all companies listed are on page 64.) The recent cutback in excise taxes has made it possible for most companies to reduce their prices to the lowest level in years. Make certain you tell your members this welcome news by any and all means at your disposal—in the club newsletter, your pre-season shop promotion letter, and by word of mouth. Then watch them beat a path to your door! After all, everyone loves a bargain—and how often do you get a bargain on first-quality goods?

PRO LINE EQUIPMENT
