Book Review

Man and his Earth, George D. Scarseth, Iowa State University Press, Ames, Iowa. Price \$4.50.

This book came to me by courtesy of William Lyons, Canal Fulton, Ohio, autographed by Mrs. Scarseth. As one reads easily through the 199 pages, one is impressed with the sincerity of this great agricultural leader who was far ahead of his time. He taught by simple illustration and, when it seemed that everyone was against him and his progressive ideas, by buying land and *doing* the "impossible" that he knew would work.

George Scarseth was widely traveled. He relates incidents from the tropics to the Arctic to nail down the facts of soils, climate and people. The story of the three pebbles was inspired by Dr. Hoffer who was one to encourage the writing of the book. For down-to-earth explanations of organic matter, soils, nitrogen and soil fertility every golf course superintendent would be well advised to have this book in his library. The book was completed just prior to Dr. Scarseth's death March 20, 1962.

The reader will find only a few tables and charts but a wealth of inspired anecdotes and illustrations that lead one to a better understanding of the earth on which we live. — FRED V. GRAU
