Amchem Products, Inc., has invented a helicopter boom, called Microfoil, for aerial pesticide spraying. Fifty-two six-inch nozzles, which contain 60 needles, are mounted along the 26-foot boom. Low liquid pressures and correct nozzle positioning create uniform droplets, with a minimum of fine droplets, a major contributor to drift control, according to the company. The boom is still being tested and is not yet on the market.

THE FINEST GREENS ARE PLANTED WITH Warren's STOLONS

Perfect even texture and color are maintained with clean, pure-strain WARREN'S STOLONS. Greens planted with seed do not hold their uniformity of color and texture as well as greens planted with stolons. They are apt to develop a "patchwork" look after a few years.

The cost of STOLONS over the cost of seed is insignificant compared to the overall cost of the establishment of a golf course. Why be satisfied with anything less than perfect greens only obtainable from pure-strain STOLONS.
