

Here's why turf needs sweeping:

Turf never looks greener and healthier than when it is regularly swept. And not only is appearance improved, but it is sustained because regular sweeping prevents the formation of thatch.

Turf-Vac eliminates this thatch build-up.

Thatch—the accumulation of old leaves, clippings, stems, roots and other undecayed material—can choke healthy grass. Water doesn't percolate through it the way it should, fertilizer applications aren't as effective. And fungus and insect pests thrive. Turf maintenance costs can soar.

And here's the best way to do it:

5 Ft. & 8 Ft. Tractor-Drawn Models

Turf-Vac powered sweepers cover the ground with a tornado of air. Grass clippings, leaves and debris are quickly removed. Thatch is prevented from accumulating because the turf is "scrubbed" clean. And with no mechanical devices such as brushes or rubber fingers ever touching the grass, the turf is left undisturbed. Nor are there any of these costly mechanical brushes or rubber fingers to replace with Turf-Vac.

More and more groundsmen are turning to Turf-Vac for a long-sought answer to proper turf maintenance. Turf-Vac can do the same for you.

4 Ft. Self-Propelled
