

## The only machine that drives top dressing materials down to the base of the turf

As every golf superintendent knows, spreading a blanket of dressing is only half the job. Materials must penetrate down to the base of the turf. That's why raking and dragging formerly constituted a big portion of the top dressing labor. Mete-R-Matic has changed this. The exclusive high speed rotating brush at the rear of the Mete-R-Matic spreads with a force sufficient to penetrate to the base of the turf. Dragging is reduced to a minimum. Which means labor costs are reduced because one man can do the top dressing job in one operation. For further information write Dept. 120.

**JACOBSEN®**

Sod Master Division / 1721 Packard Ave., Racine, Wisconsin 53403

## A NEW DIMENSION IN GOLFING...

### CONSTRUCTION

2 inch colored aluminum tubing, anodized (no paint maintenance) Advanced synthetic fiber netting insures complete safety and resistance to the damaging effects of sun and weather.

### NYLON TURF INSERTS

The new nylon synthetic turf gives the same sensation as hitting off of actual fairway grass.

### AUTOMATIC BALL RETRIEVAL

Golf Balls are automatically retrieved and gathered in a special locked section at the rear of the cage. No more manual retrieving and no more lost balls.

A fully packaged, ready-to-play golf driving range. Developed by professionals.

### SPECIFICATIONS:

36' LONG — 20' WIDE — 15' HIGH

Every golfer can have those all-important warm up shots. The finest facility available for the golf instructor — for private or group instruction.
