**Firestone Tire & Rubber Company** introduces the new Turf & Field rear tractor tire designed for golf courses, where damage to turf, particularly in sloping areas, has been a problem. The tire is 21 1/2 inches wide with a low-profile design to provide traction while giving the floatation needed to prevent cutting and chunking of turf. The tire is designed for use on standard one-piece wheels.

**Rangang, Inc.**, announces a new model Rangematic called the Mark V. The instrument uses coincidence-type optical triangulation to measure 50 yards through two miles with exceptional accuracy, according to the company. The Mark V features a 6X18 power prismatic scope and interchangeable scales for shooters, speed computation for boaters or club selection for golfers. The Dis-Tran golf scale, adjustable to the individual golfer's skill, points directly to the correct club for any measured distance. Circle No. 108 on reader service card
