Medalist 2®

SOUTHERN GOLF COURSE OVERSEEDING MIXTURE

For Championship Greens All Winter Long

A fine leaved perennial ryegrass mixture formulated especially for fall overseeding of bermudagrass greens. Proven reliability — over seven years of testing and research.

FAST ESTABLISHMENT

The fine leaved perennial ryegrasses in Medalist 2 germinate quickly and uniformly to provide a playable surface in the shortest possible time. Lessens the risk of wash-out and erosion.

DARK GREEN COLOR

Keeps its color even after hard frosts right on into early summer when bermudagrass comes back.

TRAFFIC TOLERANT

Withstands more heavy traffic than annual ryegrass and *Poa trivialis* formulations. Less wear around the cup and faster recovery from heavy play.

PUTTS TRUE

Smooth playing surface when you need it most—during winter when traffic is likely to be the heaviest. Unlike common ryegrass, Medalist 2 grows slower, more upright and does not stool in late season.

DISEASE TOLERANT

Tolerant to a wide range of turf diseases including cottony blight and dollar spot. Medalist formulas treated with KOBAN fungicide have shown almost complete resistance to *Pythium* during the seedling stage.
