from the  
**World's Largest Grower  
of Fine Sod!**

## Warren's® A-20 KENTUCKY BLUEGRASS

**Rated first in disease resistance  
resulting in less maintenance  
cost!**

A-20 is "Performance Proven" to be the finest turf for tees, fairways, approaches and collars. It is rated first in disease resistance by leading turf organizations and universities. Easier to maintain . . . less cost!

A-20 thrives when mowed down to 1/2 inch and grows upright with a more pronounced stiffness. A-20 is rugged. It grows back faster when injured and keeps its brilliant green color longer enhancing the beauty of your course.

## Warren's® A-34 KENTUCKY BLUEGRASS

**The SUN and SHADE bluegrass  
that thrives in a wide range of  
soil and climatic conditions!**

A-34 is the only bluegrass that grows vigorously in SUN and SHADE and is "Performance Proven" from coast to coast to be the best all-round turf for most all conditions. It recovers fast when injured.

A-34 is highly rated in disease resistance making it easy and economical to care for. A-34 will tolerate up to 65% shade when maintained at a 2 inch mowing height. In the sun and slightly shaded areas it can be mowed down to 1/2 inch.

# RYEGRASS IS THE PERENNIAL FAVORITE

Linn Perennial Ryegrass is the versatile grass which does a variety of jobs well. Over the years it has proven to be a top performer on virtually any greenway.

- Germinates in 10 to 14 days, or even less under ideal conditions.
- Requires little or no seed-bed preparation.
- Rapidly develops a strong root system.
- Vigorous spring growth makes it ideal for repairing damaged areas.
- Stands up to abuse and heals rapidly if injured.
- May be sown under unfavorable conditions.
- Performs well in poor soils and is acid tolerant.
- Often used as a nursegrass with slower-starting varieties.

## A GRAND NEW TRIO OF TURF GRASSES

Modern grasses are different. Now you can take advantage of improved varieties designed to do a superior job on your turf. They're new, but proven in the field and at university testing stations.

### Highlight

CHEWINGS-TYPE  
RED FESCUE

An improved Chewings-type red fescue, Highlight is distinguished by its brilliant green color. Highlight is dense growing and tends to hold this denseness through the summer. A good mixer, it persists and will eventually colonize in shade areas, in poor, sandy soils, windswept slopes and under trees.

### Compas

TURF-TYPE  
PERENNIAL RYEGRASS

A truly fine-leaved turf-type perennial ryegrass, Compas is low-growing and fast germinating. It develops sod of above average density and is resistant to excessive traffic and wear. It's dark green color and fine leaf means it will blend beautifully with other standard lawn grasses such as Kentucky bluegrass and red fescue.

## EMERALD (SMARAGD)

An improved creeping bentgrass especially developed by W. Weibull AB of Sweden for fine turf areas such as golf greens, fairways, tees and other fine turf. Forms a dense creeping turf capable of healing injuries without the excessive vigor which creates "puffiness". Exceptionally uniform in appearance, Emerald does well from Canada to the Mid-Southern U.S. Along with excellent cold tolerance, it has persisted during hot, humid summer months.

# Manhattan

Turf Type  
**PERENNIAL  
RYEGRASS**

Manhattan perennial ryegrass was selected and developed by Dr. C. Reed Funk, Rutgers University. Manhattan develops a uniform dark green, leafy, dense turf with leaf blades finer than most Kentucky bluegrasses. Excellent for hard use areas such as tees, green aprons, cart path flare areas and hard use problem areas. Mowability ratings are excellent.

CERTIFIED MANHATTAN IS GROWN BY THE  
MANHATTAN RYEGRASS  
GROWERS ASSOCIATION  
P. O. Box 145 • Hubbard, Ore. 97032

■ Exclusive Marketing ■  
Agent

# HELLO

# PO-SAN<sup>(TM)</sup>

## Good-bye FAIRWAY Poa-Annua!

You can get rid of fairway Poa-Annua by stopping seedhead development and foliar growth with PO-SAN<sup>(TM)</sup>. Fairways will have more open turf! PO-SAN leaves no phytotoxic residues in soil — allows overseeding immediately with desirable perennial grasses for exceptional germination and development. One PO-SAN treatment retards poa and inhibits poa seedhead production for a period up to 45 days. PO-SAN also eliminates clover, dandelions and other broadleaf weeds. Stock up on PO-SAN today! See your Mallinckrodt distributor.

# Impact of excellence

The major effect of building a better product is the increased capability of the user of that product to do a better job. Excellence begets excellence! The Moody Impact Pop-Up Sprinkler for large area sprinkling provides the extra measure of efficiency for grounds maintenance men. Special features include: built-in surge protector to prevent head damage ... exclusive high flow stainless steel spindle ... exclusive long wearing Turcite and Turcon thrust bearing washers ... parts standardization, with parts for full and part circle heads completely interchangeable ... positive reversing mechanism ... retracting spring to insure positive pop-down when water is turned off ... outer sweep and inner sweep nozzles set at dissimilar angles to prevent stream interference ... completely removable internal assembly from above ground for easy field maintenance.

It is a product of excellence; ergo, it does an excellent job!
