Speed-Fil

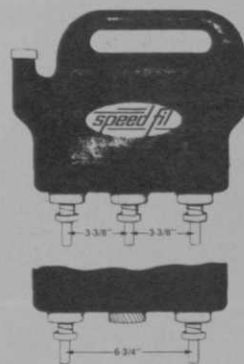

One Push Does It All!

If you service golf cars, tractors, mowers, and other equipment with batteries . . . you need SPEED-FIL automatic battery filler. It saves time and money. It fills battery cells to the correct level with an automatic shut off, and it may be used with sulphuric acid for original fill or water for regular maintenance.

SPEED-FIL fits all standard 6-volt (dispenser unit-order No. SP3). It will also fill three cells at a time on the popular No. 24 Series 12-volt batteries and many tractor or industrial batteries as well. Holds 1½ gallons of liquid and is made of rugged heavy duty high density polyethylene. Practically indestructible!

One push fills 3, 2 or 1 cells simultaneously, quickly, to correct level . . . then shuts off automatically.

EFFICIENCY DISPENSERS CORPORATION
