**BROADENING BUSINESS PROFITABILITY** of the clubhouse, SIGO Incorporated is currently marketing a portable dance floor. Offered in either oak or teak finishes, the floor can be easily assembled and carted to any room in the building. To minimize floor-edge drop-off hazards, SICO has designed a 30 degree border trim for appearance as well as safety. A simple tongue and groove arrangement couples the three-foot square sections together quickly and tightly. All contact between sections consists of metal touching metal. The entire floor unit comes with a storage caddy. Each caddy holds approximately 20 sections.

**FEATURING A FIBERGLASS BODY** and a steel frame, the 1975 golf cars from American Continental both sell for over \$1,750. The Minnesota-based firm features both gas and electric three-wheel models. Included on both vehicles are several features—a sweater box, rust-proof scorecard holder, drinkholder and vinyl coated seats. Length for both

models is 91 inches, while the width is 47½. Weight for the gas car is 760 pounds, while the electric car is 900 pounds.

**ADVANCED PERFORMANCE FEATURES** are the major items in Ford's current line of rider mowers. The Tractor and Implement Operations division has introduced two new models this year, the 66 and 61. Both units offer new eight-horsepower engines, new steering wheels teamed with a new gear-reduction system and gear-driven transmissions with a new inside belt-drive idler that softens the clutching. Three forward gears offer speeds up to 6¼ mph along with a reverse gear. Several optional attachments are also available including dump cart, leaf mulcher, rear-mount grass catcher and snow blade. Heavy-duty one-piece rigid steel frames on both Ford rider mowers have full running boards for easy mounting and operator comfort and safety.

**AVAILABLE IN SEVERAL COLORS**, ColorChain is the latest innovation of the Campbell Chain Company. The line is available in either one or two inch diameters. A variety of post assortments complement the chains. Aimed at the course market, the chains can provide a wide variety of recreational uses, including traffic control at tournaments, tees and areas that should not be traveled by golf cars.

**SAVING TIME AND MONEY** and controlling the hectic club schedule is the main aim of Caddylak's Time-wise Magnetic Scheduling Calendar. At a glance, the entire plans of the operation can be viewed to help supply important information immediately. Guessing at the schedule is no longer necessary. Wasted time sorting through papers, making phone calls and last minute rushes are eliminated. To make changes, it just takes the movement of a magnet. Important activities, dates, deadlines and appointments can be emphasized through the use of different colors.

**COMBINING THE POWER OF A BUILT-IN** sound system with the compactness and light weight of a portable, Argos Sound introduces its Voice Director II. This system goes anywhere, indoors or outdoors, for any job in any environment. All components of the system are completely built-in and integrated into an attractive but rugged case that can be hand-carried anywhere. Included in the package are an amplifier, six-speaker sound column, low-noise microphone and professional stand. The Voice Director II is completely operational on a single 12 volt battery that delivers up to 100 hours of service. The system can also be adapted to conventional electrical systems.

**PROS LOOKING FOR AN ADDITIONAL SERVICE** for their club repair operation might look at the I.D. labels currently being marketed by Miller Golf Company. To eliminate the endless confusion and aggravation due to lost or misplaced clubs, these tags can serve that purpose while earning big profits for the shop at the same time. Included on the tag, which is black vinyl with the printing stamped in gold, is the member's name, address and zip code.

**OFFERING THE ULTIMATE** in weight distribution, balance and control, the Klunker II is the top of the line putter of the J. E. Becker Co. The Klunker II reduces club head rotation when impact is off-center, as it most always is. The "choke" at impact is eliminated since the face is well in front of the shaft. The putter is also helpful in lining up breaking shots.

**EFFECTIVE AND LOW COST** control of weeds and grass along steep bar ditches, along ambankments and culverts, next to bridges and guard rails and other areas which have been impossible for mowing machines is now offered by the new Span-Spray herbicide unit.

Attached to the front of any tractor, the unit is extended on a boom which sprays an area of 25-feet. Span-Spray reaches areas formerly only accessible to slow and costly hand labor.

Besides these obvious savings and the advantages of better maintenance, the Span-Spray, when used at first emergence of many common weeds and grasses, can control for an entire season in just one trip, where mowing and handwork may have required six or more cuttings per year.
