

NEW PRODUCTS

A MARRIAGE of exotic metals and advanced design, the new Titanium irons by Con-Sole offer another innovation to the industry. Providing the principles of toe/heel weighting, the clubs feature the largest sweet spot and the lowest center of the gravity in the market. Utilizing perfect balance and highly functional design, the Titanium line is an ultra light iron, 44 percent lighter than stainless steel. All models offer investment cast heads.

FORGOTTEN COMBINATIONS, lost keys, removal of locks by ex-members can all be time-consuming to solve when locker protection is left up to the individual. These problems can all be eliminated through a locker system administered through the club. Master Lock, the world's largest supplier, offers several designs. Included in their clubhouse package is the built-in key lock with precision pin tumbler mechanism, pictured below.

ABLE TO create and control cool air, as well as hot, the Wine Vault by Viking Sauna offers a professional way to store wine at the club. The unit is shipped in a prefabricated form, but is easy to assemble or disassemble in minutes. The Wine Vault also offers mobility, convenience and the security of a key lock. The unit is self-contained and lined throughout with redwood. A specially designed refrigeration unit inside is adaptable to regular household current. Each bottle is individually suspended on redwood racks.

POPULAR on tennis courts indoors and out, the Plexipave color finish system is chosen because it's tough and durable, but at the same time, economical. Made of 100 percent acrylic, Plexipave will not develop shiny areas after years of hard play. The system comes in eight colors, enabling it to complement or contrast to its surroundings. The surface is suitable for any climate. A free brochure about the system is available free from the maker, California Products, on request.
