Lester-MATIC "BIG FORTY" 40-AMP CHARGER

All over the country, users of big-battery electric vehicles are turning to Lester-MATIC chargers for fast, dependable charging. The all-new Lester-MATIC "BIG FORTY" offers a full 40-amp start rate—really pours the amp-hours into your batteries during those important early hours of charging. Normally, high capacity batteries are charged to 3/4 capacity in only 4 hours. After the peak charge, the rate automatically tapers down to 3-amperes, preventing overheating and excessive gassing, and resulting in excellent equalization of cells with low water consumption.

Both golf car and industrial users in northern areas have found the "BIG FORTY" to be a top cold-weather performer—extending vehicle hours and cutting time on charge. Lester's new heavy-duty "BIG FORTY" will keep your big batteries in peak condition over a maximum life period.

All Lester chargers feature solid-state circuitry for years of trouble-free performance. A unique flux oscillator circuit compensates for changes in line voltage. Lester chargers are easy to use by untrained personnel—no taps or rate controls to set. Over 200,000 chargers in daily use have proven the reliability of the Lester-MATIC. Specify Lester for your next electric vehicle charger.

Specify the Lester-MATIC "BIG FORTY" with your car order, or special order from your distributor.
