

Lester

INTRODUCES A
NEW
ERA IN BATTERY
CHARGING
...completely
automatic
Lestronic
Chargers

PRECISE BATTERY-CHARGING WITHOUT MANUAL TIMERS OR TAPS

All-new Lestronic chargers totally eliminate over and undercharging for new, old, or defective batteries, whether hot or cold. Precise charging is achieved by Lester's patented Electronic Timer, utilizing the most advanced integrated circuits. The rate of voltage change is monitored while the battery is charging. When this rate levels off, the charger automatically shuts off.

If left connected to the Lestronic charger, the battery will remain charged indefinitely since the Electronic Timer automatically turns back on approximately every 2½ days. Battery life is increased. Maintenance man-hours are drastically reduced.

After 29 years of building battery-chargers, Lester remains the world's largest manufacturer of chargers for electric golf cars, industrial vehicles, and related markets. The new Lestronic chargers are now continuing this trend-setting pace.

Specify Lestronic chargers for your next electric vehicle. Or write or phone for complete information on the first truly automatic battery charger. You'll never return to the past era of battery-charging again.
