## Big-tractor features distinguish small tractors

John Deere's model 850 and 950 tractors are powered by three-cylinder, water-cooled, fuel-injected diesel engines driving through eight-speed manual transmissions with two-lever control. The 850 delivers 22 horsepower at the power takeoff; the 950, 27 PTO horsepower. A differential lock engages on the go to keep you going through mud, loose soil, or wet turf with power to both rear wheels. A category 1 three-point hitch enables quick attachment of a flail mower, spin spreader, or other equipment. Also offered: a 6-foot rotary mower.

## Battery-powered herbicide sprayer

The Herbi spinning disc sprayer, from Micron West, Inc., features a rotary atomizer which spins at 2,000 rpm, converting the spray material into a hollow cone of even-size 250-micron droplets. Its 12-volt motor is powered by flashlight batteries. The Herbi utilizes the amount of active ingredient specified by the chemical manufacturer, but with a fraction of the normal water required. It works equally well for pesticides and fungicides.

## Loaders for compact tractors

Schwartz Mfg. Co. offers its new 1100 and 1200 loaders for domestic and imported tractors in the 10- to 30-horsepower range, both two- and four-wheel drive. Lift capacity at full lift height is 530 pounds for the 1100 loader and 800 pounds for the model 1200. Maximum lift height of the 1100 is 72 inches; of the 1200, 90 inches. A wide range of buckets is available. A slim-line crossmember gives optimum visibility with maximum rigidity.

## Aluminum walkways bridge streams, roads, and gullies

AEF Aluminum Structures Ltd. designs and builds aluminum bridges and walkways encompassing a wide range of applications — including many on golf courses. The bridges and walkways are pre-engineered and of modular construction for economy and ease of assembly; no field welding is required. Made of high-strength, lightweight, corrosion-resistant aluminum extruded alloys, they require no painting and are maintenance-free. The bridges are triangular or rectangular in cross-section and of angular or tubular construction, depending on the design parameters and end use. Standard models can span 100 feet or more.

## Turfgrass insecticide

ProTurf Division of O.M. Scott & Sons has reformulated its Insecticide III so that the package weighs 24 percent less and costs \$3.50 less. Applied by drop-type or rotary spreader, Insecticide III treats ½ acre per bag with normal coverage, ¼ acre at heavy rate (such as to control hyperodes weevil).

## Undermount rotary

An undermounted rotary mower, model 348KB, is available from the Woods division of Hesston to fit Kubota model B7100 four-wheel-drive tractors and model B6100 tractors with two- or four-wheel drive. The mower cuts a 4-foot swath with three high-speed, overlapping blades, mowing up to 1½ acres per hour.

## Irrigation-control sensors

Hydrovisors are solid-state sensors which measure root stress and control automatic irrigation valves to deliver water as needed to turf, trees, or shrubs. The sensors install easily

to existing control clock wires, require no maintenance, and are weatherproof and temperature-resistant. Each sensor can control three valves. Hydro-Dynamics offers the sensors in lengths from 7 to 28 inches.

## Water cooler

The model 13P water cooler from Oasis is recommended for use outdoors and in shop installations. It saves operating costs since water not drunk helps cool incoming water. A stainless steel cabinet to help protect the cooler from damage is optional.

## Front mowing tractor

Jacobsen Manufacturing Co.'s HF-15 mowing tractor cuts a 15-foot swath through rough or fine turfgrasses. Hydraulic power allows the reels' carrier wheels to run freely, and the front-mounted position of the reels lets the operator see where he is mowing at all times.

## The *Lestronic* charger... extends battery life and reduces maintenance.

The Lestronic charger totally eliminates over and undercharging on any battery, regardless of age, temperature, or condition. This "fool proof" charger will *extend* battery life and *reduce* required maintenance with precise charging every time.

### The Lestronic knows when to quit.

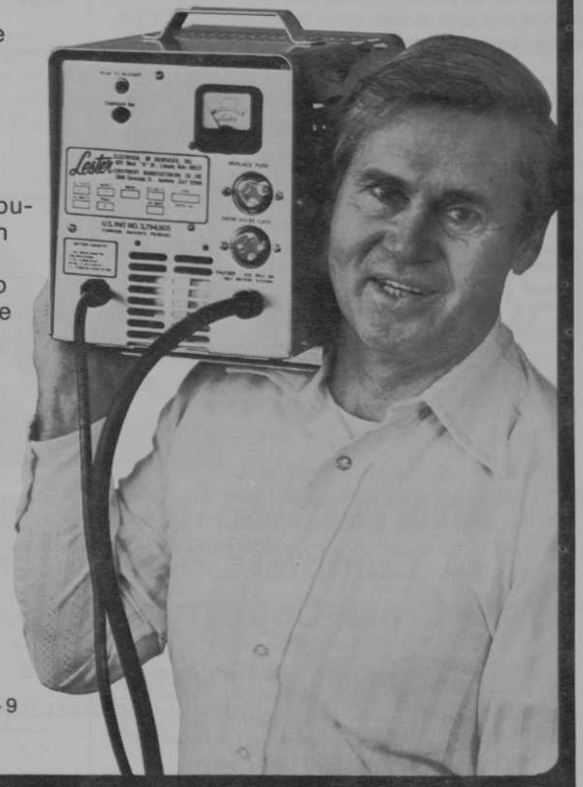

There's no trickle charge to burn your batteries. The patented Compu-Time I timer totally shuts off when the battery is fully charged. Left connected, the Lestronic will keep batteries charged indefinitely since the Compu-Time I timer will automatically turn on every 2½ days.

**"The charger with a brain."**
