

CONCENTRATE ON RAISING TURF.

NOT CASH.

You need a lot of equipment for effective turf management. And we lease it all. Mowers, spreaders, sprayers, tractors and aerators, just to name a few.

Quite simply, we specialize in leasing this equipment so you can keep your credit

open for other operating expenses and conserve your capital.

Leasing. It's the smart way to grow, and a real hedge against inflation. Find out more by calling us at 800-547-4905. The call's on us.

INCREASE EARNINGS, SERVICE & SPACE Remodel your present storage space, update with NEW *Stafford* VERTICAL BAG RACKS

- Wear and tear of golf bags is completely eliminated
- Damp bags dry faster — no mildew
- Faster, easier storage
- Provides a neat appearance
- Easy to install and add more as needed

Your members will like the extra convenience and care. Your pro shop profits from 40% more space these racks make available. Double unit shown holds 16 bags, size 2' x 4' x 6'-6" high, gives 12" x 12" space for bags. Single unit holds 8, size 1' x 4' x 6'-6" high. Sturdy steel. Bags set solid on tapered shelves. Send us your floor measurements, we will plan a layout and quote you — no obligation. U.S. and Canadian patents. Send for folder.

Products

PORTABLE PUMP

Weda has corrosion - resistant unit

Weda Pump, Inc. has introduced the Model S150 corrosion-resistant pump. The S150 is capable of pumping out sumps and other messy chemical

solutions whether acidic or alkaline. Weighing only 62 pounds, the S150 can easily handle temperatures up to 104 F; heads to 50 feet at capacities up to 140 gpm.

Buna AP rubber-covered diffuser and adjustable wearplate are one of maintenance saving features of the S150. A chromium steel impeller and corrosion-resistant inner casing, outer parts and bearing bracket make this portable ideal for quick pumpouts. No permanent mounting brackets or cabling is required. The pump utilizes a 1 or 3 phase 1.3 hp motor. No external control box is required. Controls are built into a sealed unit in the top of the pump.

DIESEL WALK BEHIND

Bunton claims first for standard model

Buntons' Diesel-Powered, 36-inch and 52-inch rotary mowers are claimed to be the first walk or ride behind, offered as standard models in the

U.S.A. The 8 H.P. diesel engine is a 4 stroke Acme, with direct Bosch System fuel injection, air-cooled by flywheel fan, force feed lubrication, oil filter, remote control governor and rope start. The crankcase is high resistance alloy, diecast aluminum; the single cylinder is special pearlitic iron with deep fins; cylinder head is also pearlitic finned iron. The crankshaft is hardened-tempered forged steel, supported on anti-function bearings. Oil bath air cleaner is standard equipment.

Bunton is also introduced diesel engines on their 61-inch and 71-inch front-mounted-tractor-mowers with 19 H.P., 2 Cylinder, Air-Cooler Wisconsin or 30 H.P., 2 Cylinder, Air-Cooled Deutz.

NEW CHEMICAL HOSE

Co-extrusion for high performance

Flexitube Int. Corp. has pioneered the development of a new spray hose called "SUPERTREL". Pro-

duced by a process called "Co-extrusion", SUPERTREL combines different plastics with different properties into one type of high performance hose.

The inner core is manufactured with a very thin layer of Dupont's Hytel, polyester that fills the gap between the contrasting yielding nature of rubber and the rigidity of plastics. Hytel has better high temperature properties than the polyurethanes, and can be used satisfactorily at higher temperatures in the same fluids. Hytel is not susceptible to solvent extraction or heat volatilization either. Hytel has excellent resistance to hot, moist environments.

Flexitube Int. Corp. has taken all the properties of Hytel for the inner bore of the spray hose, welded it to a double layer of braid for a good PSI, and surrounded the thread with an abrasion-resistant cover of corrugated PVC.

TRI-ACTION VALVE

Provides less restriction

A valve that provides less restriction in water flow and works on both plastic and asbestos cement water lines is being marketed by Hydro Engineering, Inc. Called the Tri-Action Irrigation Valve, it provides pressure relief, vacuum relief and positive air relief at pump head and at end of line. The Tri-Action Valve can be pre-set in plant or field, and does not require factory pre-set PSI setting. It is necessary to stock only one size for all systems, up to and including 12-inch IPS and PIP. It is also available in low pressure ranges. Hydro Engineering also markets a Dual-Action Valve for air and vacuum relief, and specifically engineered for use with the Tri-Action Valve.

21 HORSEPOWER ENGINE

Kohler introduces second of series

Kohler Co. has introduced a 21-HP engine, model KT21, the second in a series of air cooled, four cycle, twin cylinder engines.

The new model is almost identical in size and configuration to the 17-HP KT17 which is already in use by major equipment manufacturers. Both are designed to power a variety of equipment — lawn and garden, construction, industrial, and agricultural.

The KT21 features long-life demountable cast iron cylinder for heavy-duty use. Crankshafts are made of forged steel and camshafts of durable cast iron. Combustion air is drawn from within the cooling fan housing, thus substantially reducing air intake noise. The engine is designed for easy installation in an enclosure for further noise reduction. Breaker points, condenser, spark plugs, oil fill, dipstick, air cleaner, and carburetor are all conveniently accessible for ease of service. Other features include: Automotive type oil pump; High clearance

Ryegrass Now Has an Added Dimension

Emergence of the highly successful, exceptionally handsome turf-type perennial ryegrasses lends further credence to the age-old claim that "ryegrass is the world's most widely used grass."

For years both regular annual and perennial ryegrass have found a ready home where there is need for a fast-germinating grass to quickly form a strong root system and provide a durable, handsome, inexpensive, easy-to-maintain turf.

The finer-bladed proprietary varieties have further broadened the realm of ryegrass. Now you'll find the turf-type varieties on every greenway where the finest possible turf is a necessity.

They have proven themselves on greens, tees and fairways of some of the world's finest golf courses, thriving at standard cutting heights as well as when close-cut for a putting surface.

And both the public and proprietary varieties are the perfect answer for the winter seeding of golf course greens and fairways in the Southern U.S.

You can count on ryegrass to germinate in a week or less, respond rapidly to fertilization and never require pampering.

Ryegrass . . . it's truly the all-around performer.

BOB-CAT MOWERS

Wisconsin has new brochure

Wisconsin Marine, Inc., manufacturer of Bob-Cat

Mowers, has developed a new brochure covering their riding and intermediate lawn-

mowers. The 8 page, 4-color brochure shows the 48, 61, and 74-inch mowers with the choice of a Briggs and Stratton 18 HP engine or an Onan 19-9 HP engine. Accessories include a snow blower, snow blade, vee plow, vacuum and road broom which operate off the hydraulic/PTO systems of the tractor. A winterized cab is also available. The intermediate line of Bob-Cats, powered by a Briggs and Stratton 11 HP engine, is available in 32", 36" and 48" cutting widths. Accessories for the intermediates include a riding sulky, an all metal dump catcher and a rear door dumping large capacity wire catcher.

UTILITY SEED MIXTURE

Scotts' mixture for quick establishment

A new grass seed product, called ProTurf Utility Mixture, has been introduced by Scotts®. It is designed for areas that need quick establishment, wear tolerance, and grass coverage throughout the year. The mixture contains Victa Kentucky bluegrass, Scotts exclusive perennial ryegrass, plus two others, and creeping red fescue. Features of the new

mixture include quick, aggressive establishment and good response to a variety of maintenance programs.

NEW TURF FUNGICIDE

Prevents and controls five diseases

O.M. Scott & Sons has introduced a new fungicide designed to prevent and control dollar spot, brown patch, leaf spot and red leaf spot. ProTurf Fungicide VI also controls Fusarium patch in Washington, Oregon and California. This new fungicide product is even effective on the benzimidazole-tolerant strain of dollar spot. It will prevent the development and spread of the above listed fungus diseases as well as the thinning of turf which is frequently connected with these diseases, according to Scotts® researchers.

For best results, ProTurf Fungicide VI is recommended to be applied as a preventive, prior to disease activity. It is designed for use on bentgrass, Kentucky bluegrass, perennial ryegrass, fine fescue, bermudagrass and St. Augustine.

BUCKET SEAT

Universal seat is indestructible

The Grand Rock Company's GR-007 universal bucket seat features a virtually indestructible metal shell with a high contoured back and standard fore-and-

aft slide adjustment for greater operator comfort and safety. Optional armrests provide additional comfort and side-to-side support.

The full foam seat and back cushions are covered with heavy-duty, all-weather vinyl, and can be quickly and individually replaced in case of damage or wear. The GR-007 can be quickly mounted on any greens mower, fairway tractor, trap rake, or other vehicle.

Write 210 on reader service card

SQUIRREL/GOPHER BAIT

Two new products are available

Two new RoZol (chlorophacinone) baits are now available for ground squirrel and pocket gopher control, and do not cause bait shyness, according to Chempar Chemical Co., the manufacturer. RoZol ground squirrel bait is a paraffinized pellet formulation. It has a California label for special applications also. RoZol pocket gopher bait is a coarse grain bait for use where holes made by burrowing gophers can be hazardous. Bait is placed in gopher tunnels with probes.
