PRODUCTS & SERVICES

Retaining wall reinforcement

Versa-Lok Retaining Wall Systems introduces Versa-Grid soil reinforcement for segmental retaining walls. Versa-Grid provides additional soil reinforcement necessary for structural wall stability when the weight of retaining wall units alone is not enough to retain soil loads placed on walls.

Versa-Grid is available in three strengths. It's flexible with no memory so it lays flat after being unrolled, and no special tools are need for installation.

For more information, contact 800-770-4225, www.versa-lok.com or CIRCLE NO. 200

Mower

The Toro Co. introduces the Groundmaster 4000-D, featuring a 51-horsepower Kubota diesel engine. The 4000-D features an 11-foot rotary mower that delivers power, maneuverability and cutting performance, according to Toro.

Rear discharge decks deliver even dispersion of clippings for a clean after-cut appearance. The tight wheelbase combined with significant steering angles enable operators to easily handle and direct the machine. Also, fourwheel drive traction in forward and reverse while mowing provides strong footing in variety of turf conditions.

Toro also offers the Multi Pro 1250, which offers a proportional drive spray control system. The precision spray control system is tied to the drive system.

The application flow rate instantly and proportionally adjusts to changes in the speed of the spray vehicle, according to the company. The reliance on an operator's expertise and precision is minimized.

Spiker/seeder

Gandy Co.'s spiker/seeder overseeds and aerates in one pass and has a 44-inch seeding width with 1,220 replaceable spikes. The spikes create 693 vents per square yard and 854 vents per

square meter, and are threaded into an 18-inch by 48-inch steel roller with rolled edges.

Precise metering along with a resilient rubber rotor and spread plate assures even seed distribution, including bentgrass, according to the company.

Carbon-based fertilizer

Carbotech Technologies offers
NutriGrow, an organic carbon-based fertilizer. NutriGrow's formulation ensures
even, steady and predictable
growth rates, according to
the company. It can reduce
the use of pesticides and
improve turf's water
absorption.

The fertilizer can also increase stress tolerance and turf's overall health by supplying a broad spectrum of nutrients, according to the company. NutriGrow is time released according to the plant's metaliolic demand at each growing stage.

Sod cutter

Turfco's 512 sod cutter is built for maneuverability and engineered to keep machine weight down, according to the company. It's also structurally designed to cut through the toughest soil conditions.

The 512 sod cutter is operator friendly with handle grip clutch control and operating instructions on the handlebar. The handlebar clutch control stops the sod cutter instantly when the operator releases it.

▼ Golf cup

Napex Golf introduces the Brass Tuff-Core golf cup, combining the tradition of an antique brass cup with the convenience of a modern plastic cup.

The Brass Tuff-Core adds a brass bottom to the original white polycarbonate outer shell and extruded aluminum pin support. The extruded aluminum is purer and denser than current die-cast

metal cups and provides added resistance to the wear and tear put on cups by wind and repeated flagstick removal.
