Area calculator

Forestry Suppliers offers the X Scape, an area calculator to instantly measure square footage. The calculator accurately measures greens, tee boxes and bunkers based on a three-component system that uses radio frequencies to measure straight angles from a perimeter to a fixed point, then calculates and maintains a summary total of the total area in feet or meters. You simply place the yellow 360-degree transponder onto its staff which is then positioned in the pin slot of a cup. Measurements are made by walking the perimeter with the X Scape calculator and gathering readings by aiming the hand unit toward the transponder.

Humic acid

Growth Products offers 12 percent Humic Acid Plus Amino Acids, a high-quality, easy-to-use organic matter source. The product is derived from Leonardite, a rich and active source of humic acid.

The product is blended into a homogenous liquid, which also includes natural plant extracts, to provide additional organic carbon sources that enhance soil quality and plant growth, according to the company. The high concentration of active, soluble humic acid is an effective tool for correcting soil compaction and freeing up micronutrients that are bound in the soil.

Sprayer

The **JRCO** 30-gallon Zero-Turn Sprayer is a tow-behind unit. Used with the the company's front-mount electric broadcast spreader, it can make a zero-turn mower into a complete application vehicle, according to the company. The sprayer has a 3.5-horsepower engine. The three-section breakaway boom has 5-, 8- and 11-foot spray patterns.

Rolling system

Turfline offers its True-Surface Universal Design Vibratory Greens Rolling System, which features a single set of rollers that adapt to fit most triplex greens mowers in minutes. To fit a different mower, a superintendent must simply change the mounting hardware. Vibration rolling disperses dry sand from turf and saves reels and bed-knives, according to the company.

GPS software

CTN Data Service offers Precision Course Management, a Global Positioning System mapping software package. The software gives superintendents the ability to GPS map their courses and track products (fertilizer, pesticides, etc.) applied to their courses. The software also features an equipment area for superintendents to track maintenance equipment and parts used in repairing the equipment.

Weather data can also be tracked and printed or stored for future reference.
